

## D.W. Tomlin 3.5-Ton High Lift Trailer

The D.W. Tomlin High Lift Trailer is the premier choice for high-capacity, safe material handling. Designed specifically for loading top dressing into spreaders from a raised height, this trailer combines rugged construction with surgical precision.

- High-Lift Versatility: Heavy-duty scissor action and a steep tipping angle allow for easy loading into high-sided spreaders or containers.
- Precision Control: Rear-mounted hydraulic valve levers allow the operator to manage the lift height and tipping angle with total accuracy.
- Robust Construction: Built with a heavy-duty chassis and drawbar to manage its 3.5-ton capacity with ease and stability.
- User-Centric Design: Includes a remote operation system and a parking stand for safety and convenience when unhitched.

### Specification

<b>Load Capacity</b>	3.5 Tons
<b>Body Dimensions</b>	3.03 m x 1.83m
<b>Lift Mechanism</b>	Heavy-duty scissor action high lift
<b>Tailgate</b>	Rear opening with integrated baffle and chute
<b>Operation</b>	Remote operation + Rear-mounted hydraulic valves
<b>Stability</b>	Heavy-duty drawbar and parking stand
